

WORK SITE ORIENTATIONS

Online Employee Onboarding

Streamline your organization's onboarding process by reducing administration and having everything completed before workers show up on site.

Streamline your onboarding process with the latest and greatest innovations in online training.

Let us help you implement adaptive learning that can provide experienced workers with high-level updates, key information, and brand new knowledge while providing new workers all the in-depth information, background knowledge, and learning needed to get up to speed.

Full Customization

Virtual Proctoring: Using the employee's webcam, we can virtually proctor your orientation, ensuring users pay attention to the content and verifying their identity.

Certificate Upload Technology: Workers can upload all their historical training directly into the orientation. These records will automatically populate in their account after being verified by a supervisor or manager.

President's Message: Using technology as simple as a cellphone, it's easy to take a video of the president addressing the team, then upload the message directly into the orientation.

Mainstream Multimedia: Admins can upload your current orientation directly into the system, whether it consists of video, HTML5 files, or PowerPoint slides. Workers can then access it through any Internet-ready mobile device.

SCORM Compliant: Both SCORM 1.2 and 2004 files can be uploaded directly into your orientation for easy access.

Self-Registration: By creating a website link to your orientation, you can have contractors or employees simply click to access the orientation, setting up an account for themselves in minutes.

Exam Engine: Using the system's integrated exam engine, it's easy to pepper questions throughout the material for higher levels of employee engagement and knowledge retention.

Digital Forms: Digital forms can be included as part of the orientation, allowing employees to complete all of their policies, procedures, self-identifications, medial questionnaires, etc. right inside the course.

Worker Position

IMPORTANT: This section must be completed first.

Work Agreement with: *
Select your employer

☒ Construction and Environmental Ltd.
☐ Earth Ltd.
☐ Field Services Ltd.

Work Classification *
Select your employee type

☒ Salary
☐ Hourly
☐ Contractor

Worker Information

Full Legal First Name *
Joshua

Full Legal Middle Name *
Alexander

Full Legal Last Name *
Smith

Seamless Onboarding

The beauty of online orientations is the seamless way the system communicates the training record to your departments. Send your Human Resources department the proper paperwork the second the course is complete. Provide instant verification to the supervisors once training requirements are met. Give gate security an easy way to check if personnel are validated for entry. All of this and more is possible through one, easy-to-use application.
